Physician Assistant Studies Program Solicitation of Clinical Sites and Preceptors Policy

Students are not required to solicit clinical sites or preceptors. Preceptors are any instructional faculty member who provides student supervision during a supervised clinical practice experience (SCPE), also defined as practicum and clinical rotation. The Physician Assistant Program must coordinate clinical sites and preceptors for program-required rotations. Referrals are accepted. Student family members, including spouses and current or future family members, are also not permitted to serve as preceptors or clinician instructors.

Students may train with multiple seasoned clinicians, such as MD/DO, PA/NP, CNM, PhD, or any licensed clinician; LMSW, MALLP, MALPC, or LBSW.
